

Virtual 13th Annual FIB SEM Meeting

A **one-day workshop**, jointly hosted by the FIB SEM User Group and Canadian Centre for Electron Microscopy (CCEM), McMaster University, on all FIB related topics such as new and novel application areas for FIB, multi-modal approaches involving FIB, advances in FIB, FIB sources, and FIB related instrumentation and techniques, image and data processing techniques for FIB data.

April 29, 2021

Workshop is FREE.
REGISTER BY visiting the website below.

ABSTRACT SUBMISSION.
Abstracts should be 250 words or less in length. Please email your abstracts to fibsem2021@fibsem.net.
Abstract Notification: April 2nd, 2021

TOPICS

- New and novel application areas for FIB
- Multi-modal approaches involving FIB
- Advances in FIB
- FIB sources (LMIS, Plasma IS, GFIS, LMAIS, LoTIS)
- FIB related instrumentation and techniques
- Image and data processing techniques for FIB data
