

# Future Directions of Soft Materials

**A TWO-DAY WORKSHOP**, jointly hosted by Brockhouse Institute of Materials Research (BIMR, Dr. Alex Adronov), and Canadian Centre for Electron Microscopy (CCEM, Dr. Nabil Bassim), highlighting research on soft materials. This workshop will be a platform for researchers to learn about various soft material applications and characterization, as presented by McMaster researchers and keynote speaker, Molly Shoichet (2020 Gerhard Herzberg Canada Gold Medal for Science and Engineering). The focus of the workshop is to highlight soft material research conducted at McMaster University with the overall goal of promoting collaboration amongst researchers.

## June 21-22, 2021

Workshop is FREE.

 REGISTER by visiting the website below.

SUBMIT ABSTRACTS for poster presentations by May 31, 2021 to [ccemreg@mcmaster.ca](mailto:ccemreg@mcmaster.ca) (details on website below)

<https://ccem.mcmaster.ca/outreach-and-events/>

### KEYNOTE SPEAKER

- Molly Shoichet (University of Toronto)

### TOPICS

- Biomaterials
- Materials for Sustainability
- Nanostructured Materials
- Additive Manufacturing

### HIGHLIGHTED FACILITIES

- Centre for Advanced Light Microscopy
- Canadian Centre for Electron Microscopy
- Canadian Light Source
- McMaster Analytical X-ray Diffraction Facility (MAX)
- Nuclear Magnetic Resonance (NMR) Facility
- Water research

Brockhouse Institute  
for Materials Research
